## ABOUT ME

A motivated undergraduate computer science student from Bina Nusantara University, Kemanggisan. Passionate about application development and Artificial Intelligence (AI). Experienced in designing and developing scalable, maintainable applications across web, mobile, and iOS platforms using modern frameworks and technologies, with hands-on experience integrating AI features into real-world applications. Aiming to advance technical expertise in modern development technologies to build beneficial solutions. Strong in collaboration, creative problem-solving, and innovative solutions.

## EDUCATIONAL HISTORY

**Sep 2023 - Present | Bina Nusantara University**

Computer Science Undergraduate Student

- Current GPA: 3.81

**Jul 2020 - Apr 2023 | SMAK Penabur Harapan Indah**

Natural Sciences

- Final Score: 89.5

## WORK EXPERIENCE

**Mar 2026 - Present | Apple Developer Academy - iOS Developer Intern**

- Conducted generative and evaluative user research to identify pain points and validate concepts.
- Designed intuitive UI and app architecture aligned with Apple's Human Interface Guidelines (HIG).
- Built iOS applications using SwiftUI and focused on clean code and performance.
- Collaborated with teams to rapidly prototype, iterate, and deliver digital solutions.

**Feb 2024 - Feb 2026 | Superprof - Private Mathematics Teacher**

- Delivered Math lessons using engaging, interactive methods and a logical thinking way.
- Provided questions and discussion to students.
- Adapted teaching methods to match individual student learning paces.
- Conducted a lesson using the English language.

**Sep 2025 - Dec 2025 | PT Ousean Digital Company - Data Analyst Intern**

- Analyzed datasets using Excel functions and pivot tables to generate clear insights and reports.
- Applied R programming to perform statistical analysis and create data visualizations.
- Presented findings with actionable recommendations to support decision-making processes.
- Cleaned and preprocessed raw datasets to ensure data accuracy.

**Aug 2024 - Nov 2024 | Kumon - Teaching Assistant**

- Tutored students in Math (Mathematics) and EFL (English as a Foreign Language) subjects.
- Checked and provided feedback on homework assignment.
- Recorded students' learning progress in student record books.
- Motivated students to build independent learning habits.

## IT PROJECT

**Sep 2026 | SwiftShop - E-Commerce Microservices Platform**

Developed a native iOS e-commerce application using SwiftUI and a Swift Vapor microservices backend, implementing API Gateway routing, JWT authentication, Redis caching, PostgreSQL databases, and Docker service orchestration for product browsing, cart management, checkout, and transaction tracking.

**Jul 2026 - Aug 2026 | Mambo - Mango Distribution Monitoring IoT System**

Developed an IoT-based monitoring system for mango transportation that collects real-time temperature, humidity, and GPS data using ESP32 sensors. Implemented MQTT-based telemetry communication with a Vapor backend and PostgreSQL database, enabling shipment monitoring and automated detection of environmental conditions that may affect mango quality.

**Apr 2026 - May 2026 | Petik.In - iOS Guitar Chord Progression App**

Developed an interactive iOS app featuring real-time camera validation for finger placement and audio analysis to verify chord accuracy. Built with Swift, seamlessly integrating complex image and sound processing logic with an intuitive frontend interface.

**Apr 2026 - May 2026 | BamBoard - Forex Forecasting & Analytics Platform**

Developed a web-based financial dashboard that forecasts foreign exchange rates using advanced predictive modeling. Implemented automated data ingestion and daily model retraining pipelines to continuously update predictions, visualized through an interactive frontend interface.

**Oct 2025 | Smart Chat - PDF Chatbot**

Developed an AI-powered document assistant that analyzes and explains PDF contents using LangChain, IBM Watsonx.ai, and chroma. Integrated retrieval-based QA and text summarization pipelines with Gradio for an interactive user interface.

**Sep 2025 | AthleX - Fitness & Lifestyle Platform**

A modern web app combining workout plans, meal planning, and gym equipment e-commerce. Built with React (TypeScript), Firebase, and the Midtrans payment gateway for a seamless fitness experience.

---

## HARD SKILLS

**Software Development**

- Programming Languages: Swift, Python, TypeScript, JavaScript, R
- Framework & Libraries: SwiftUI, Vapor, Flask, Laravel, Express.js, React, Streamlit
- Backend & Systems: REST API, WebSocket, Microservices, API Gateway, JWT, PostgreSQL, Redis, Docker, Git

**Machine Learning & AI**

- Methods: ARIMA, LSTM, CNN, RNN, Residual Learning, Feature Engineering, Model Evaluation
- Tools & Frameworks: TensorFlow, PyTorch, Keras
- Generative AI: Retrieval-Augmented Generation (RAG), Embeddings, Vector Search, LangChain, Chroma

**Data Analytics and Forecasting**

- Analytics: Statistical Analysis, Data Preprocessing, Data Visualization
- Forecasting: Time-Series Forecasting, Forecast Evaluation
- Tools: Python, R, Excel

## SOFT SKILLS

Leadership • Teamwork • Problem Solving • Critical Thinking • Decision Making • Time Management • Creativity

## LANGUAGES

**Indonesian** - Native

**English** - Fluent

**Mandarin** - Basic

---

## AWARDS AND CERTIFICATIONS

**Oct 2025 - Generative AI Engineering with LLMs**

Issued by IBM

**Oct 2025 - IBM Generative AI Engineering**

Issued by IBM
